*W. Biltmore
Nursery*

WHOLESALE TRADE-LIST
SEASON OF 1901-1902

BILTMORE NURSERY

BILTMORE, NORTH CAROLINA

THE BILTMORE NURSERY was established in 1889. For ten years almost the entire output was used on the Biltmore Estate in the extensive landscape and forest plantations. In 1898 a small surplus of stock was offered to the trade by means of a typewritten list and circular, and during the season 1899-1900 the first formal catalogue or trade-list was issued. In this, our third published price-list, is offered the stock of the present season, which consists wholly of ornamentals. We have no connection whatever with any other nursery, and employ no agents, all of our business being transacted from our office at Biltmore, North Carolina.

THE LOCATION is in the heart of the mountains of Western North Carolina, at an elevation of about two thousand feet above sea-level, where the temperature ranges from 90° above to 12° below zero. The variations in temperature peculiar to the Southern Alleghany Region, its evenly distributed and bountiful rainfall, long growing season, and rich but shallow soil, combine to produce a

QUALITY OF STOCK unusually good in root-formation, thriftiness, and hardiness. All our stock is nursery-grown; we do not offer cheap, collected plants.

LANDSCAPE ARCHITECTS will find our stock particularly suited to the demands of forest, park, and suburban planting.

PROPAGATING CAPACITY. Our greenhouses and coldframes cover an area of 34,000 square feet which, in connection with seed beds of more than ten acres extent, trained men, and a variety of carefully tilled soils, give us special facilities for furnishing rooted cuttings, seedlings, and transplanted plants.

NURSERYMEN will find the small plants particularly valuable for transplanting into nursery rows.

FREE FROM INSECTS AND FUNGOUS PESTS. The stock of the Biltmore Nursery has been inspected by the State Entomologist, and is pronounced free from all insects designated as dangerous pests, and apparently healthy in every respect.

A CERTIFICATE of inspection will be sent with each shipment.

PACKING. The utmost care will be used in digging and preparing the plants for shipment, and charges for packing cases will be made on the following basis:

BOXES including packing and delivery to freight or express depots:

14 feet long,	30 x 30 inches	\$3 25 each.
12 " "	30 x 30 "	3 00 "
10 " "	30 x 30 "	2 75 "
8 " "	30 x 30 "	2 50 "
6 " "	24 x 24 "	1 85 "

BALES according to size, including delivery to nearest station, 15 cents to \$2.50.

DIRECTIONS FOR SHIPPING. In the absence of explicit directions for mode of shipping, we will forward goods according to our best judgment.

OUR RESPONSIBILITY. All goods travel at purchaser's risk. We do not assume any responsibility for the safe delivery and condition of goods after shipment, except for our own mistakes, unless the terms of agreement so specify and guarantee. We are most careful to have all our plants correctly labeled, and hold ourselves prepared to replace, on proper proof, all that may prove untrue free of cost, or to refund the amount paid therefor; but it is understood that, in case of error on our part, we shall at no time be held responsible for a greater amount than the invoice price of the goods.

RATES. The prices in this list apply to quantities specified, but two hundred and fifty will be furnished at the thousand rate, twenty-five at the hundred rate, and five at the ten rate. Special discounts given on very large orders.

TERMS CASH on or before delivery to forwarding agents, unless by special arrangement.

NOTICE. All orders placed with us will be accepted only upon the condition that, should stock be injured by drought, frost, or other casualties before the shipping season, they are to be void.

CLAIMS. Should any errors occur we desire to be informed upon receipt of goods, in order that we may rectify them without serious delay.

PACKING SEASON. We ship from October 1 to May 1, with slight interruptions during midwinter.

FREIGHT RATES in effect October 1, 1901, from Biltmore to several points are here shown.
